A Hourly residuals, 50–70 km/h cells
Mean residual (log points × 100)
Hour
10 November (mean of 5 years)
Placebo dates
B Distribution of residuals
Count (log scale)
Cell-hour residual (log points × 100)
C Residuals against fitted values
Residual (log points × 100)
10th–90th percentile
Median
Fitted speed (km/h, log scale)
D Date-level contrast, 50–70 km/h cells
09h vs 08h and 10h, residual (log points × 100)
